

REMARKS

Applicants acknowledge receipt of an Office Action dated November 5, 2008. In this response, Applicants have amended claim 1 and canceled claim 10. Support for the amendments may be found, *inter alia*, in Fig. 1. Claims 1-9 and 11-17 are pending in the application.

Applicants respectfully request reconsideration of the present application in view of the foregoing amendments and in view of the reasons that follow.

Interview Summary

The Examiner is thanked for the helpful telephone interview. In the interview, the amendments made herewith were discussed.

Objection To Claim 10

Applicants have canceled claim 10. Withdrawal of the objection is respectfully requested.

The Claims As Amended Are Patentable Over The Cited Prior Art

The Office Action rejected claim 1 of the application under 35 U.S.C. § 102(b) over U.S. Pat. No. 5,567,258 (“Baumann”). The remaining claims are also rejected over Baumann either alone or in combination with other references. Reconsideration is respectfully requested.

In the previous amendment, it was argued that Baumann does not disclose at least “a deflection mirror is provided behind the objective optical path, when viewed from the user’s position”. In the Response to Arguments section of the Office Action it was noted that the “user’s position” of claim 1 is ambiguous. It was also noted that it is possible to interpret the phrase “behind the objective optical path” from the perspective of the direction of light travel.

Applicants have amended claim 1 herewith to resolve these ambiguities. The reference to a “user’s position” has been replaced with a reference to the structural element before which the user is typically located. The phrase “behind the objective optical path” has been amended to specify that the objective optical axis is positioned between a deflection mirror and the binocular head. These amendments are not intended to modify the scope of

claim 1 or surrender subject matter relative to the prior art, but rather are intended to clarify any potential ambiguities in the claim language.

The remaining claims are ultimately dependent from claim 1 and patentable for at least the same reasons.

In view of the foregoing, Applicants respectfully request reconsideration and withdrawal of the outstanding rejection under § 102.

CONCLUSION

Applicants believe that the present application is now in condition for allowance. Favorable reconsideration of the application as amended is respectfully requested.

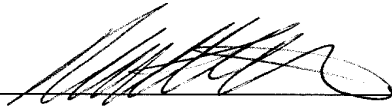

The Examiner is invited to contact the undersigned by telephone if it is felt that a telephone interview would advance the prosecution of the present application.
